## **SANGRHAY 3.0**

Sangrhay is a comprehensive tool designed and developed by Futuristic Software Consultancy. SANGRHAY is a result of close and intensive study done by our experienced business analysts along with the valuable inputs from veteran librarians to form a abstract system which is a compact, fast, secure, robust and reliable system to cater needs of all libraries.

## **SANGRHAY ADVANTAGE**

Sangrhay is a powerful tool to manage day to day operations of any library irrespective if size and volume of resources and no. of users . It allows robust operations for various library activities mentioned below.

- Acquisition of Resources (Books, Journals,Periodicals,CD’s,Audio/visual resources ).
- Bar Code Based Operations.
- Circulation Management (Issue / Receipt).
- Reservation Management.
- Member Management.
- Binder Management.
- Supplier Management.
- Security Management.

## **SANGRHAY FOR MY INSTITUTION**

SANGRHAY is a Flexible, Robust System that will be customized for your INSTITUTION and its distinguished needs. Before you can work on SANGRHAY you will define your own standards like

- Logo of the Institution
- Phone, Fax e Mail Address.
- Class Names
- Subject Names
- Racks Naming Convention
- Shelves Naming Convention
- Reservation Rules.

## **BAR CODE BASED OPERATIONS**

SANGRHAY is fully BAR CODE enabled .You can generate bar code stickers for your resources in tune with latest technology for identification system . Stickers can be put on the resources. This advanced identification system of resources results in faster and error free operations.

## **ACQUISITION OF RESOURCES**

SANGRHAY **allows** an easy way of acquisition of resources, be it be books, CD, Journals, Magazines, Video Tapes , Audio visual aids. SANGRHAY can take in all the details of resources like volume, edition , publisher, keywords , contents , subject , price , supplier , source of resource etc at the time of acquisition itself.

## **CIRCULATION MANAGEMENT(ISSUE/RECEIPT)**

Resources can be issued / received by the virtue of bar code stickers efficiently. Incase of late return applicable fines are imposed on the members automatically. Condition of the resource is also taken at the time of issue/return. Similarly you can also issue / receive periodicals and journals in library.

## **RESERVATION MANAGEMENT**

SANGRHAY understands the requirements of a big library where by certain resources are not available all the times , so the need arise for reservation system of resources.Reservation system works for all kinds of resources. System generates requests no. for all reservations made. Reservations can also be cancelled.

## **MEMBER MANAGEMENT**

SANGRHAY allows you to create different categories and Members for the library .Category wise you can even define MAX No. days for issuing of books , MAX Days for reservation of resource, Fine to be collected etc.

## **BINDER MANAGEMENT**

SANGRHAY allows you to add binders to the system you can very well issue books to the binder for binding , receive them back .

## **SUPPLIER MANAGEMENT**

SANGRHAY can handle suppliers/vendors those who supply resources to the library , From within the SANGRHAY you can generate purchase orders , receive books , enter bills and even make payment advices for accounts department summarizing the total payment to be made to the supplier.

## **SANGRHAY SEARCH (RESOURCE/MEMBER)**

SANGRHAY search allows you perform search for resources from the entire database of library resources about their details of publication, author, volume, edition, acquisition year, no of copies, availability, keywords, subject matter etc. This saves you a lot of time in getting data and taking suitable course of action rather than spending your time in collecting data and then acting on to it. Similarly You can also perform search on members and their details too.

## **SANGRHAY SECURITY**

SANGRHAY offers unique security feature not available in any other software. SANGRHAY understands the importance of critical and confidential data of any institution, thus SANGRHAY has role based security system, which allows the management to define the roles, their access. Users can be grouped under these roles, which mean selective people have access to selective menu options. Administrator can even grant / revoke permissions for operations to selective users for a given time period. This feature brings greater accountability for the system users.

## **SANGRHAY REQUIREMENTS**

SANGRHAY is an easy to install and maintain system.

**HARDWARE REQUIREMENT:** Intel X86, Apple Mac , Bar Code Scanner(Optional), Dot Matrix Printer.

(Preferably Pentium III or Greater 128 MB RAM)

**OPERATING SYSTEM COMPATABILITY:** WIN 95/98,WIN 2K,WIN NT, win XP.
